

Joseph Martella  
Professor Neville  
CS 251 Project 4 README  
April 3, 2011

**IMPORTANT NOTE:** For some reason, the `wcVoidExample` and the `HashTableTemplateTest` files are not executable by default, so you need to run `chmod -R u+x *` without the quotes to make the files executable and so the last 2 test cases will pass. Otherwise, you get a permission denied and it says the tests fail. Thank you.

Compilation:  
    `make`

Execution:  
    `make test`
